

HOW TO USE ECOGREEN

SOIL APPLICATION

Mix 100–200 ml of EcoGreen™ in 1 litre of water. Apply around the plant's root zone.

Recommended frequency: Every 7–14 days.

Supports: Root development, Soil health, Plant growth

FOLIAR APPLICATION

Mix 100–200 ml of EcoGreen™ in 1 litre of water. Lightly spray the leaves.

Apply during the **early morning or late afternoon.**

Recommended frequency: Every 7–14 days.

Supports: Plant vigor, Growth response, Plant development

SEEDLING & TRANSPLANT USE

After transplanting, apply a diluted EcoGreen™ solution around the root zone.

This helps support plant establishment and early growth.

SIMPLE ROUTINE. CONSISTENT GROWING.

DILUTE ➤ APPLY ➤ OBSERVE ➤ REPEAT

Always dilute before use and avoid over-application.

CARE & STORAGE

• ALWAYS DILUTE BEFORE USE.

• DO NOT OVER-APPLY.

• SHAKE WELL BEFORE USE.

• STORE IN A COOL, DRY AND SHADED PLACE.

• AVOID DIRECT SUNLIGHT.

• KEEP CONTAINER TIGHTLY CLOSED.

• KEEP OUT OF REACH OF CHILDREN.

A BETTER WAY TO GROW

We believe agriculture begins with soil.

We believe food quality begins with healthy growing environments.

And we believe even the smallest urban garden can contribute to a greener and more sustainable future.

ECOGREEN IS MORE THAN A GARDENING PRODUCT.

It represents a commitment to:

SOIL RESTORATION

Building healthier growing environments.

URBAN GARDENING

Making productive growing possible in smaller spaces.

SUSTAINABLE AGRICULTURE

Supporting responsible and regenerative approaches to growing.

COMMUNITY WELLBEING

Encouraging healthier, greener living environments.

FUTURE FOOD SECURITY

Helping households participate in growing their own food.

MORE THAN GARDENING

A SMALL SPACE CAN BECOME A LIVING ECOSYSTEM.

URBAN GARDENING IS NOT ONLY ABOUT GROWING PLANTS. IT CAN BECOME A WAY TO:

GROW FRESH FOOD AT HOME

Bring vegetables, herbs and other plants closer to your table.

RECONNECT WITH NATURE

Create a daily connection with living things—even in the city.

CREATE GREENER SPACES

Transform balconies, rooftops and homes into more vibrant environments.

SUPPORT A HEALTHIER LIFESTYLE

Make growing part of everyday life.

SUPPORT HOME FOOD SECURITY

Use available space to contribute to what your household grows and consumes.

URBAN GARDENING & HOME GROWING SOLUTION

LIFE STARTS BELOW, FROM SOIL TO SOUL.

YOUR GARDEN
CAN BE SMALL.
YOUR IMPACT
DOESN'T HAVE TO BE!

Grow Fresh Food at Home

START WITH THE SOIL

Every great garden begins beneath the surface.

Plants don't grow alone. They grow within a living soil environment that supports their roots, nutrient availability and overall development.

MOST PRODUCTS FOCUS ON FEEDING THE PLANT. ECOGREEN STARTS WITH THE SOIL.

EcoGreen™ is a premium liquid soil health and regenerative gardening solution designed for modern urban growers and home gardeners.

It supports healthier soil systems, stronger plant development and efficient nutrient use—helping create a better growing environment for the plants you grow at home.

// **HEALTHY SOIL
STRONGER ROOTS
HEALTHIER PLANTS
BETTER GROWING** //

Because soil health is the foundation of plant health.

AGRICULTURAL SCIENCE. MADE FOR YOUR HOME.

For more than 13 years, EcoGreen has been developed through agricultural experience, farmer engagement, research and innovation in Ethiopia.

That experience now comes into the urban garden.

Whether you are growing food on a balcony, cultivating herbs in your kitchen garden, maintaining plants on a rooftop or simply caring for your indoor plants, EcoGreen brings a professional agricultural approach to smaller growing spaces.

15+ YEARS
FIELD-PROVEN AGRICULTURAL EXPERIENCE

TRUSTED BY MILLIONS
FARMERS ACROSS ETHIOPIA

AWARD-WINNING
AGRICULTURAL INNOVATION

MADE IN ETHIOPIA
PROUDLY DEVELOPED & PRODUCED LOCALLY

IDEAL FOR

VEGETABLES • HERBS • FRUITS • FLOWERS
INDOOR PLANTS • BALCONY GARDENS
ROOFTOP GARDENS • CONTAINER GARDENS

WHY ECOGREEN™?

- SUPPORTS HEALTHIER SOIL**
Helps build a healthier living soil environment around your plants.
- SUPPORTS STRONGER ROOTS**
Promotes a healthier root-zone environment for plant establishment and development.
- SUPPORTS PLANT GROWTH**
Helps support stronger plant growth and overall vigor.
- SUPPORTS NUTRIENT EFFICIENCY**
Helps plants make better use of available nutrients.
- SUPPORTS FLOWERING & FRUITING**
Designed to support plant development, flowering and fruit production.
- SUPPORTS PLANT RESILIENCE**
Helps plants manage everyday growing stresses such as heat, drought and transplant shock.
- DESIGNED FOR URBAN GROWING**
Ideal for smaller growing environments including pots, containers, balconies and rooftops.
- SUPPORTS SUSTAINABLE GARDENING**
Encourages a soil-focused approach to growing that supports long-term productivity.

GROW IT WHERE YOU LIVE

You don't need a farm to grow.

A balcony. A rooftop. A few containers.

A sunny window. A small backyard.

Any space can become a place to grow.

PERFECT FOR

- VEGETABLES**
Leafy greens, kitchen vegetables and home-grown produce.
- HERBS**
Grow fresh herbs close to your kitchen.
- FRUIT PLANTS**
Support the growth of fruit-bearing plants in suitable containers and spaces.
- FLOWERS**
Support vibrant plant development and flowering.
- INDOOR PLANTS**
Bring healthier growing environments into your living spaces.
- BALCONY & ROOFTOP GARDENS**
Turn compact urban spaces into productive green spaces.
- POTS & CONTAINER GARDENS**
Designed for the realities of growing in limited soil volumes.
- SMALL GREENHOUSE SYSTEMS**
Suitable for controlled and compact growing environments.

LIFE STARTS BELOW, FROM SOIL TO SOUL.

At EcoGreen, we believe the future of growing starts from the ground up. From Ethiopian farms to urban homes, we are bringing years of agricultural experience closer to the people who grow.

GROW SOMETHING GOOD.

Restoring Soil. Nourishing Life.
Empowering Growers. Transforming Futures.
